

Onde di design / Waves design

On 25 Apr, 2014 By Redazione ITalent With 0 Comments

At Din Design space of Ventura Lambrate, the emergent Roberto De Santi of Home Studio presented his Dune Line, a modular bookcase with a new design and sinuous lines.

An original undulating line defines each module and creates striking compositions. If you're up against, Dune looks like a regular succession of frames; approaching, the eyes are captured and dominated by a fascinating and extreme movement.
